

ARKA HEALTH, INC.

DEMONSTRATION ENVIRONMENT SYNTHETIC DATA POLICY & NO-PHI ATTESTATION

Controls ensuring the ARKA demonstration environment contains no Protected Health Information

ARKA-DEMO-001 · Version 1.0 · Confidential — Internal

Document No.	ARKA-DEMO-001
Version	1.0
Effective Date	June 10, 2026
Last Reviewed	June 10, 2026
Document Owner	Arri Kanna, Founder & Chief Executive Officer — Privacy & Security Officer
Approved By	Arri Kanna, Founder & Chief Executive Officer
Classification	Confidential — Internal
Review Cycle	Annual, and upon any material change in operations, systems, or law

This document contains confidential and proprietary information of ARKA Health, Inc. (“ARKA”). It is furnished for informational and compliance purposes, may not be reproduced or disclosed to any third party without the prior written consent of ARKA, and must be returned or destroyed upon request. Nothing in this document constitutes legal advice.

1. POLICY STATEMENT

The publicly accessible ARKA demonstration environment — comprising the website at getarka.health and the interactive demonstrations of the ARKA-CLIN, ARKA-ED, ARKA-INS, ARKA-RURAL, EHR-embedded, and CDS Hooks modules (collectively, the “**Demo Environment**”) — shall contain **no Protected Health Information and no real patient data of any kind, whether or not de-identified**. Every patient, clinician, encounter, claim, image reference, and clinical scenario in the Demo Environment is synthetic: generated by ARKA’s synthetic-data tooling or authored as fiction for illustration.

2. PREVENTIVE CONTROLS

1. **Provenance.** Demonstration records are produced by the platform’s synthetic-data generator (`lib/cds-platform/validation/synthetic-data-generator.ts`) or seeded by scripts that mark every record with the literal prefix “[ARKA-DEMO]”, making demo data programmatically identifiable and bulk-removable (`scripts/seed-ins-demo-data.ts`; `scripts/reset-ins-demo.ts`).
2. **No ingestion path.** The Demo Environment exposes no interface for uploading clinical documents, connecting an EHR with production credentials, or bulk-importing records; EHR demonstration flows run against sandbox FHIR servers with vendor-published test patients only.
3. **User notices.** Conspicuous notices in the user interface and in the website Privacy Policy (Section 3, “No PHI in the public Site or demos”) instruct users not to submit PHI into any input field; free-text fields are minimized and length-limited.
4. **Separation.** The Demo Environment shares no database, credentials, or tenancy with any future production deployment; production PHI shall never be copied into the Demo Environment (ARKA-SEC-010, § 2(d)).
5. **Naming discipline.** Synthetic personas use implausible or clearly fictional identifiers, demo MRNs use a reserved non-conformant pattern, and CI lint rules guard demonstration fixtures from importing production data sources.

3. DETECTIVE AND CORRECTIVE CONTROLS

1. **Quarterly sweep.** The Security Officer shall execute and document a quarterly scan of demo data stores and repository fixtures for PHI-indicative patterns (SSN formats, plausible MRN/DOB clusters, free-text narratives), recording the query set and results.
2. **Inadvertent submission procedure.** PHI submitted by a user in violation of posted terms shall be treated as a Security Incident (ARKA-SEC-006): the record is purged from primary stores and logs within twenty-four (24) hours of discovery, purged from backups on their rolling expiry, and the event documented; no use of such data is permitted for any purpose.
3. **Review gate for new demos.** Each new demonstration scenario requires the Privacy Officer’s sign-off that its content is wholly synthetic before publication.

4. LABELING

Wherever a demonstration surface could reasonably be mistaken for live clinical data by a viewer (screenshots, sales decks, video walkthroughs, conference demonstrations), the surface shall carry a visible “Synthetic data — not real patients” designation. Marketing and investor materials reproduce demonstration content only with such labeling intact.

5. VERIFICATION PERFORMED

In connection with the adoption of this Policy, the following verification of the repository and seed tooling was performed and recorded on June 10, 2026: (a) automated pattern scan of application code, libraries, scripts, and fixtures for Social Security number formats returned zero matches; (b) inspection of seed tooling confirmed the universal “[ARKA-DEMO]” record prefix and dedicated reset script; (c) inspection of demonstration fixtures confirmed generation via the synthetic-data module; and (d) inspection of user-facing surfaces confirmed presence of no-PHI notices in the compliance bar and demonstration components. This verification shall be repeated quarterly under Section 3(a).

6. ATTESTATION

The undersigned, in their capacity as designated Privacy Officer and Security Officer of ARKA Health, Inc., attests that, to the best of their knowledge after the verification described in Section 5: (i) the ARKA Demo Environment contains no Protected Health Information and no real patient data; (ii) the controls described in Sections 2 and 3 are adopted and in force; and (iii) this attestation will be renewed, and the underlying verification re-performed, no less frequently than quarterly.

DOCUMENT CONTROL & REVISION HISTORY

Version	Date	Author / Reviewer	Description of Change
0.9	May 22, 2026	A. Kanna (drafting); external review pending	Initial draft circulated for internal review and counsel comment.
1.0	June 10, 2026	A. Kanna, Privacy & Security Officer	Adopted as effective policy of ARKA Health, Inc. by written approval of the undersigned officer.

ADOPTION AND APPROVAL

The undersigned, being the duly designated Privacy Officer and Security Officer of ARKA Health, Inc., hereby adopts this document as an official policy of the Company, effective as of the Effective Date set forth on the cover page hereof. This document shall be reviewed no less frequently than annually and upon any material change to the Company’s operations, information systems, or applicable law, and may be amended only in accordance with ARKA-GOV-001 (Information Security & Compliance Program Charter).
